

Insights to Elevate Performance

The changing healthcare environment drives home health agencies to look for new ways to maximize operational efficiencies while continuing to elevate the quality of patient care. The OCS Healthcare Information Platform is a simple, real-time data solution that provides actionable information to enhance your performance, turn data into intelligence, and empower your decision-making.

Patient Care / Clinical Quality

Would you like to reduce patient ER visits and hospitalizations? Do you want to understand the efficacy of your disease management programs or which of your clinicians are performing at the highest level? Efficiently and objectively identify high-risk patients, understand variations in your organization's performance, and effectively manage day-to-day operations.

Comparative Insights

Do you know how your performance compares to your peers? Gain a clear picture of your clinical and financial outcomes relative to other agencies nationally and locally, and drill down into subsets of patients to evaluate key clinical programs against other similar patient populations.

Demonstrating Excellence

Do your stakeholders understand the value that your organization offers patients, partners, and the community? Objectively communicate your agency's strengths to key stakeholders and quantifiably market your benefits to increase referrals.

Risk Management

Are you prepared for an audit or review for payment recoveries? Are you confident about the quality of your data? Recognize if your data may look questionable to outside entities and regulatory bodies and standardize quality control measures within your workflow.

Elevate your organizational performance, improve quality, and demonstrate value—plus gain access to the largest and most accurate comparative database in the homecare industry with the Healthcare Information Platform.

Home health providers need meaningful information to effectively:

- Improve operational efficiencies and achieve higher quality outcomes
- Meet challenging industry regulations
- Prepare for performance-based payment reform

Healthcare Information Platform empowers your organization to:

- Access meaningful and actionable performance metrics
- Gain a 360-degree view of organizational performance
- Take advantage of high-level, executive dashboards
- Drill into patient-level details for root cause analysis

THE HEALTHCARE INFORMATION PLATFORM

The Healthcare Information Platform is an online, real-time solution that sets the standard for home health information use with the most accurate daily, comparative, patient-level and executive dashboard reporting available. More importantly, it transforms your data into meaningful, actionable performance metrics and benchmark analyses for empowered strategic decision-making.

Healthcare Information Platform – Operational

Gain detailed patient-level reporting for quality assurance and root cause analysis. Benefit from flexible filters that reveal patient, clinician, team, diagnosis, and payer details. Leverage predictive modeling to identify risk for acute care hospitalizations and emergent care. Understand the underlying data that drives organizational performance.

- ▶ Drive clinician accountability through OASIS verifications and clinician-level outcomes, utilization, and cost analyses
- ▶ Track key data points such as case weight, reimbursement analysis, potentially avoidable events, and more

Healthcare Information Platform – Strategic

Take advantage of flexible, real-time reports for strategic decision-making. Measure, analyze, compare, and trend your organization's clinical, financial, and utilization metrics for a more accurate 360-degree view of agency performance and position relative to your colleagues and competitors. Use executive dashboards to quickly gain an aggregated, agency-level view of performance for insightful analysis.

- ▶ Dig into the details with PPS analyses, plus quality outcomes and process of care reports
- ▶ Recognize agency performance on multiple perspectives through the use of disease management, P4P, clinical, and financial benchmarks and analysis

Risk Profile Analysis

Benchmark your performance in 30 potential regulatory indicators with the largest, most accurate homecare database—giving you an intelligent profile that helps you prepare for unpredictable reviews or audits from a myriad of regulatory entities.

- ▶ Easily understand areas where your data might look questionable to regulatory entities
- ▶ Quickly evaluate performance in select payment and quality metrics
- ▶ Demonstrate compliance to internal and external stakeholders

More powerful. More affordable.

OCS offers trusted solutions to empower your home health organization. Get one powerful resource for proven data-driven decision-support tools and post-acute expertise to improve patient care and increase operational performance, profitability, outcomes, and patient satisfaction.

Bring home positive outcomes

With the Healthcare Information Platform, you'll inform your decisions, empower your results, and elevate your performance. We have a wealth of information to share with you.
